PLR Content Resources

PLR Content Resources

There are 2 ways to use these resources.

1. DFY

Some of these resources may contain done-for-you PLR reports. If using these, you must review the content and make edits to the content to make it unique from others who have also purchased these reports.

Minimally, you should modify the title and have a new e-cover graphic designed.

2. A la carte

Find and compile related PLR content (articles) into a report using the provided Report Template found in the pre-workshop site.

NOTE: We do not know if all of these resources have ready-made reports or not. You'll have to search them. Also, some require a subscription, some don't. If you find something you really like and it requires signing up, you can simply cancel before the trial period expires.
